Abstract (en)
[origin: WO9701972A1] A footwear sole construction has an insulating layer (1) with poor heat conductivity but good permeability to heat radiation, the insulating layer (1) and a reflective layer (4) attached thereto being placed between the inner lining or the like and the wear sole. The reflective surface (4a) of the reflective layer is attached directly to the material of the insulating layer (1), e.g. by attaching a metal foil to the insulating layer (1) by vacuum evaporation.
