Abstract (en)
[origin: WO9853984A1] An identification card strip assembly (20) including a support strip (22) having thereon at least one, and preferably a plurality of identification card blanks (24) removably and adhesively adhered to the support strip (22). Each identification card blank (24) has a front printing surface (26) for printing indicia (28) thereon and a rear adhesive surface (30) having an adhesive (32) thereon. The rear adhesive surface (30) is removably and adhesively adhered to the support strip (22). The card blank (24) includes a first sheet (34) and a second sheet (36) foldably connected to each other along a fold line (38). Each sheet (34, 36) has at least one substantially identically shaped aperture (40) therein. Each of the sheets (34, 36) is of a size and shape and the aperture (40) is located in each sheet (34, 36) so that when the card blank (24) is removed from the support strip (22) and the sheets (34, 36) are folded along the fold line (40) upon each other with the adhesive surfaces (30) joined to each other, the first sheet (34) and the second sheet (36) are substantially superposed upon each other and substantially coextensive with each other and the apertures (40) in each sheet (34, 36) overlay each other to form a mounting means for mounting the card (24) on an object.
