Abstract (en)
[origin: WO0000391A1] Apparatus for feeding boxes for packaging items, in particular food products, employable in association with a packaging machine, wherein the boxes (14) present a respective axis of orientation (A), and wherein said machine presents a first operative station (9) defining a working area (8) wherein said boxes (14) must be positioned with said axis (A) oriented according to a pre-set direction. The apparatus comprises means for receiving the boxes (14), to be fed to the working area (8) of the packaging machine, such as to house a plurality of box stacks (16) arranged according to a plurality of longitudinal and transverse rows of box stacks (16).
