Abstract (en)
[origin: DE19544806A1] The can (10) for paint or adhesive (24) can be closed by a removable lid (16). The can contains a bag (18) resting against the inside of it. The top edge sector (32) of the bag round its aperture is folded inwards onto a cover (30) resting on the surface (28) of the paint or adhesive in the can. The bag and the cover may be made of the same foil material. The cross section measurements of the bag may match those of the can, but its longitudinal measurement is greater than that of the can.
