Abstract (en)

[origin: WO9910248A1] A method of forming and filling a container (10) with a liquid pharmaceutical product includes the steps of forming a container (10) from a suitable plastics material, the container having an open mouth; filling the container (10) with the liquid pharmaceutical product through the open mouth; sealing the open mouth with a seal (14) to form a sealed container (10); providing a recess (16) in the top (14); and securing in the recess a plug (18) of a suitable natural or synthetic rubber or plastics material, which material is adapted to permit the passage therethrough of a needle or the like and to seal again after withdrawal of the needle or the like.
