Abstract (en)

[origin: WO9822364A1] A resealable can end (10) having a neck member (11) and hat member (12) which can be sealed onto and removed from the neck member (11) is capable of containing a product under pressure. This end can (10) be attached to a metal container body by a conventional seam (20). The end provides resealing containment of the contents of the container and an improved mouth for better pour opening and direct drinking. The method of making and the apparatus for making the can end is disclosed.
