Abstract (en)
[origin: WO9901356A1] A carton and carton blank (10) for forming a carton of the top gripping type for accommodating a plurality of containers, for example bottles, which carton is tubular in structure and comprises a first panel (16) having a plurality of apertures (34, 64), each of which has at least one foldable retention tab (30, 32) which operatively engages the underside of the radially protruding part (P1, P2) of a container (B) present in the aperture wherein a brace tab (54) is connected to one of said retention tabs and is disposed between a pair of adjacent containers to minimize relative movement between those containers and wherein a free end edge of said brace tab operatively engages the underside of the radially protruding part of one of said adjacent containers.
