Abstract (en)

[origin: DE19718821A1] The invention relates to a box with a hinged lid, for cigarettes or similar. According to the invention, a neck (12) is connected to a main section (33) in the area of a front panel (13) of the box by means of tabs (34, 35), said neck being part of the single piece box. A front panel (30) of the neck is provided with recesses (41, 42) in order to avoid a multi-layer structure in the area of the tabs (34, 35), which are folded into a Z shape (34, 35). At least partial areas of the folded tabs (34, 35) fit into these recesses (41, 42).
