Abstract (en)
[origin: WO9855710A1] A light-transmitting panel comprising two spaced-apart, elongated plates (2, 3), which are connected together near long sides (7, 14). The first plate is provided near a first long side (7) with a rib (8) extending away from the second plate (3), and with a strip (11) connected thereto, which extends towards the second plate (3), and which is connected to a flange (21) of the second plate disposed near the first long side (7). The first plate (2) is provided near the second long side (14) with a hook-shaped flange (15), which can be connected in use to a rib (8) of the adjacent plate.
