Abstract (en)

[origin: FR2764410A1] The invention concerns an electronic smart card (1) designed to be placed in a PCMCIA interface of any other reader, serving the same purpose, the interface being capable of being plugged into a card reader (2) and comprising at least a housing (3), with dimensions allowing the smart card (1) to be only partially inserted. The invention is characterised in that the smart card (1) portion which cannot be inserted in the PCMCIA interface or the like, comprises at least identifying means (4). The invention is preferably applicable in personal computer smart card readers.
