Abstract (en)

[origin: WO9912133A1] The present invention is based on the idea, how to create a locker, which will be in no doubt useful in leisure pools, hotels and other similar tourist objects, and among others e.g. also in the industry, and which handling, namely unlocking/locking should be carried out without any difficulties by using such means and in such a manner which are completely compatible and useful for handling with other means and use of these means, which are available for the user in the entire complex of activities in the environment, where the user of the locker is to be found. Such a locker comprises a framework (1) which consists of few one against each other and preferentially one above each other in rows placed drawers (2), which are all equipped with the door (21), which can be locked or unlocked by means of appropriate locking mechanism (5), whereby a card-reader (4) suitable for reading magnetic or so called chip-cards as well as a processor (4) are foreseen, by which the locking unit (52) is controlled representing together with at least one lock plate (51) at least a part of appropriate locking mechanism (5).
