Abstract (en)

[origin: EP1008710A1] The lock assembly consists of a housing (2) with an operating mechanism for rods connected to the espagnolette bolts, and a nut (6) with a square aperture for a handle shank. It has a sectional and/or pivoted locking member to allow the nut to be prevented temporarily from rotating, set in a recess (15) in one wall (16) of the housing and made in the form of a retaining tongue (17) engaging with a lug (18).
