Abstract (en)

[origin: WO9904636A1] The invention provides methods of evaluating a treatment for a heart disorder. The invention also provides methods of delivering a compound to the heart of a subject. A heart cell, into which has been introduced by somatic gene transfer, a nucleic acid which results in the expression of phospholamban, a heart tissue, into which has been introduced by somatic gene transfer, a nucleic acid which results in the expression of phospholamban and a heart, into which has been introduced by somatic gene transfer, a nucleic acid which results in the expression of phospholamban are also provided by the invention. Finally, the invention provides a method for treating a subject at risk for a heart disorder.
