Abstract (en)

[origin: FR2752719A1] The osteosynthesis system for spinal column comprises first (30), second (2) and third anchoring elements adapted for being fixed to the column vertebrae (4), and a rod (18) adapted for being received in the second and third anchoring elements (2) to be connected with each other. The system comprises a section of flexible linkage (32) adapted for exerting traction between the first and second anchoring elements (30, 2).
