Abstract (en)

[origin: FR2767793A1] The invention concerns a device for dispensing a fluid product designed to be mounted in a reservoir neck (40), said device comprising: a dispensing member (2), such as a pump, comprising a body (20) and a mobile actuating rod (21) in said body; and a fixing ring (1) comprising a housing (12) for receiving said body (20) and a socketing skirt (10) to be adapted in said reservoir neck (40). The invention is characterised in that the skirt (10) outer wall (15) is provided with at least a peripheral joint sealing (14) adapted to be urged pressed against the reservoir inner wall (41).
