Abstract (en)

[origin: WO9818679A2] An improved, tamper-evident container having a reclosable zipper-type fastener useful for providing access to the interior of the container is disclosed. The reclosable fastener is characterized by a pair of mating sealing strips wherein each one of the pair is attached to a common surface of the container. The container is further characterized by the provision of a security seal to provide a tamper-evident closure for the container until it is initially opened.
