Abstract (en)

[origin: DE19737528A1] The invention relates to a method and a device (1) for transmitting data in mobile radio telecommunications systems. An access system is arranged between a base station controller (BSC) (2) and a plurality of base transceiver stations (BTS) (4). Said access system establishes a point to multipoint connection between said base station controller (BSC) (2) and said base transceiver stations (BTS) (4).
