Abstract (en)

[origin: EP1010504A2] The separating device has a knife (5) running diagonally at an angle of 1-45 degrees to the paper web axis, to which the horizontal paper web (4) is supplied. Alternatively, the knife may be horizontal and the paper supplied to it at the specified angle. The knife may be angled in combination diagonally to the web axis and the running direction, or diagonally to the web axis and at a right angle to the running direction, or vice versa.
