Abstract (en)

[origin: EP1010545A1] The closing cap has a cap shell and a hard plastics clip on the outside fixed at one end in the cap. The fixing end (7) of the clip (6) has a covering (15) of a soft thermoplastic elastomer, forming a collar (16) on the outside of the cap shell, covering the edge region of the aperture (2) in the cap shell in which the fixing end of the clip is fitted. The covering with collar is produced by injection casting onto the clip in a casting mold.
