Abstract (en)

The foot (1) consists of a main surrounding section (3) with a concave recess (4) to receive a post or mast, and a hinged locking member (9) which holds the post or mast in the recess. The locking member is held in the locked position by lugs (9f) on its edges (9e) engaging with slots (5a) in the main section which are set in rows to accommodate posts or masts of different sizes. A variant of the design has a locking member in the form of a slide-in wedge.
