Abstract (en)
[origin: EP1010844A1] The lock plate system includes a carrier part (1) fixed at a frame with a front plate (3) located at the carrier part (1), and with an adjusting unit to match the front plate to a lock catch located at the door leaf. The front plate (3) is located at the carrier part (1), essentially vertical to the plane of the front plate (3), for the adjusting of the position assignment, between the front plate (3) and the carrier part (1), using an adjusting unit for any movement required.
