Abstract (en)
[origin: EP1010958A1] The refrigeration unit has at least one freezer compartment (16) closable by a door, cooled by evaporator levels (19,20) at intervals one above the other and contg. at least one frozen goods container. A melt water collection pan (27) is arranged in the freezer compartment below the lowest evaporator level with a collection surface (28) for water dripping from the evaporator planes at the point farthest from the door. The water passes to a collection container via at least one outlet opening.
