Abstract (en)

[origin: WO9811803A1] The present invention relates to an element for connecting perforated stiles with the shelves of a rack without making use of bolts or screws, which shelves comprise perforated, bent over, transversal and longitudinal rims, characterised in that said element consists of an angle bar (1), of which the legs comprise orthogonal protrusions (2), that can be used with corresponding orthogonal perforations (3) which belong on the one hand to the stiles (4) and on the other hand to the bent over transversal and longitudinal rims (5) of the shelves (5').
