Abstract (en)
[origin: WO9816135A1] Movable office furniture consisting of the following system components: a travelling table (1), a filing trolley (1) a cupboard, an equipment box and a shelf partition (7). Said office furniture can be used in permanent company offices, at exhibitions, conferences or in the home. The tables have no cross tie-bars close to the ground between legs. At least one interchangeable box (100) can be inserted into the various types of trolleys (4). Many of such boxes can be inserted into cupboards. Shelves can be installed on shelf partitions (7) and office equipment and stationery can be stored thereon. Shelf partitions (7) can be placed back to back to form a double wall in a room and have the advantage of being produced from sound absorbing material. The office furniture can be spontaneously rearranged and several components of the system are interslidable in order to gain space.
