Abstract (en)  
[origin: WO9850005A1] A cosmetic composition is described having a cosmetically acceptable carrier, comprising a reverse thermal viscousifying polymer network comprising at least one poloxamer component capable of aggregation in response to a change in temperature randomly bonded to at least one poly(acrylic acid) component; and a cosmetically active agent which imparts a preselected cosmetic effect, said carrier and said agent disposed within an aqueous-based medium.
