Abstract (en)
[origin: WO9858943A1] The present invention provides polynucleotide sequences of the genome of Borrelia Burgdorferi, polypeptide sequences encoded by the polynucleotide sequences, corresponding polynucleotides and polypeptides, vectors and hosts comprising the polynucleotides, and assays and other uses thereof. The present invention further provides polynucleotide and polypeptide sequence information stored on computer readable media, and computer-based systems and methods which facilitate its use.
