Abstract (en)
[origin: WO9913633A1] The invention relates to a method for establishing a telephone connection via the Internet (IT). Signals are sent from a calling Internet telephone (IT1) to a call-receiving Internet telephone (IT2) and a connection is established with the corresponding access device (Z1, Z2). The IP address of the calling Internet telephone which is received from the access device (Z1) is transmitted to the call-receiving Internet telephone (IT2) and the connection established using this IP address.
