Abstract (en)

[origin: EP1013211A2] Cover element for handle fixing roses, each rose consisting of a disk (5) having a central hole for the passage of a screw (11) suited to connect said disk to one end of said handle (1) and having a series of holes (55) whose centres are distributed around a circumference (C) of said disk, said holes receiving screws (56) for anchoring said handle to a wall. Said element consists of a cover (6, 9) swivel connected to the end of the handle, said cover having a ring-shaped hole (7) with its centre set substantially along the circumference (C) of said disk where there is said series of holes, said hole having a diameter that is at least the same as the head of the screws that are tightened onto said holes. <IMAGE>
