Abstract (en)

[origin: EP1013216A2] The unit has a door with inner (6) and outer parts and a control panel with at least one internal component (14) and at least one component that can be operated and/or seen externally. For old mounting types only one basic unit is provided still with an identical inner door and the arrangement of the internal component (s) is selected so that the externally visible component can be arranged to be operated and/or seen from several levels of the housing without altering the internal component(s).
