Abstract (en)
[origin: EP1013382A1] The cartridge magazine has a strip-shaped support element (1) containing cartridges (2) containing propellant. One first free end of the support element tapers (11) and has decreasing width at right angles to the lengthwise extension of the support element and at right angles to the lengthwise axes of the cartridges. The support element has at least one locking surface (7,8) pointing towards the tapered part. The blocking surface is formed by the end surface of a slat (10) positioned on a side of the support element.
