Abstract (en)

[origin: EP1014001A2] The arrangement has at least one control element (5) mounted or able to be mounted on the outside of a panel (2), an associated holder for holding the control element on the panel and a sensor arrangement for interaction with a controller for detecting the position and/or positional change of the control element. The control element is a sliding element that automatically returns to a rest position and that moves along the panel in at least one direction (28,29).
