Abstract (en)
[origin: EP1014318A2] In a ticket issuing method, security data is first made from ticket issue request data and user identification data sent from user via a communication means and then, ticket image data is made from the ticket issue request data and by embedding the security data in the ticket image data in the invisible state, ticket printing data for printing ticket by user is made. The ticket printing data thus made is sent to user via a communication means. <IMAGE>
