Abstract (en)
[origin: US2003088921A1] The preferred embodiments described herein relate to a multi-purpose hand-held device. Some of the preferred embodiments describe a multipurpose hand-held implement comprising first and second members connected together to move between a first position, in which they form together an elongated body, and a second position. In one preferred embodiment, a multi-purpose hand-held device is described comprising a stapler and/or punch and other fold-out utensils, wherein a module containing the utensils is preferably incorporated into the stapler-punch component assembly. Other preferred embodiments are described herein.
