Abstract (en)

[origin: WO9849071A1] A carton of the top gripping type for accommodating a plurality of containers, for example, bottles, which carton is tubular in structure and comprises a first panel (16) having a plurality of apertures, each has at least one foldable tab (50) which operatively engages the underside of a radially protruding part of a container present in the aperture and a second panel (12) spaced from the first panel and comprising a support tab (30) struck from said second panel, said support tab comprising a main portion and a shoulder portion wherein an edge of said shoulder portion also operatively engages the underside of said radially protruding part to restrict movement of said second panel relative to upper portions of the container, said main portion being disposed between a pair of adjacent containers to minimize relative movement between those containers.
