Abstract (en)

[origin: WO9914448A1] A floor element comprising an extruded section (1) provided with a trough-shaped part at its upper side, which trough-shaped part is filled with a flexible material (4) consisting of bonded-together grains of a flexible material. The section is made of aluminium, and the trough-shaped part has a substantially U-shaped cross section, with a bottom part (3) whose width is more than ten times the height of the two upright wall parts (2). The grains of a flexible material (4) consist substantially of rubber or a plastic material which resembles rubber, which grains are bonded together by means of a polyurethane resin.
