Abstract (en)

[origin: DE19831956A1] A pliable strip (S), having a metal foil-covered soft middle section (10) with a central bending zone (Z) formed by foil indents (15), is new. A strip (S), which can be bent to channel shape, has flexible edge webs (11) and a middle section (10) which comprises a metal foil-covered soft core (12) and which has a central bending zone (Z) formed of metal foil indents (15) pressed into the soft core.
