Abstract (en)

[origin: WO9911991A1] The invention relates to an installation for the low-temperature separation of air, comprising at least one rectifying column which is disposed in an insulating chamber (23). In order to simplify the attachment of the rectifying column (15) in the insulating chamber (23), said rectifying column (23) is stayed in the insulating chamber by means of rope shaped members (25, 26, 40, 41) in such a way that it is disposed in a predetermined position.
