Abstract (en)

[origin: DE19740994A1] The drying frame (20) takes objects in a plastic state for placing in a drying chamber. It has individual resting points (A, B, C, D) set out on it in accordance with the shape of the object. These resting points can be adjusted individually and simultaneously to the shape of the object and can be locked in their final position. For this purpose, the frame has setting rods (12-15), a common clamping connection (18, 18') and a locking and opening device (22).
