Abstract (en)

[origin: WO9816976A1] An electrical connector (10) is provided for receiving an electronic module (60), the connector (10) having an insulative base (20) which is mountable to a printed circuit board and supports electrical contacts (26) which are also connected to the printed circuit board. A cover (30) is provided for receiving the electronic module (60) and is rotatably mounted to the base (20) and securably thereto by the cooperation of a locking disc (40) with locking projections (21) extending from sidewalls of the base (20).
