Abstract (en)

[origin: EP1016362A2] Two rows of hanger loops are provided on the rear side of the pleating tape (13) sewn onto the top edge of the curtain (3), the loops extending parallel to each other and being vertically aligned. The hook (2) has hook-shaped leaf at one end, having a suitable diameter for hooking it over a standard curtain rod (4) or line, whilst at the other end are one or more pins that can be guided into the loops, so that each pin passes through two vertically aligned loops. Several interspaced hooks are introduced into the loops and then engaged with e.g. the curtain rod.
