Abstract (en)

[origin: EP1016363A2] The tape (2) sewn into the rear side of the curtain (1) close to its top edge is provided with a first row of loops (3) for e.g. roller rings or slide fasteners in order to hang it from e.g. a rod or rail, and with a second row of loops (6) beneath the first row, for ball locks (7) that are engaged with individual balls in a ball chain (10). The distance (A) between the balls in the ball locks is less than the distance (B) between two adjacent ball locks, resulting in the pleats.
