Abstract (en)
Lift system, comprising a lift cage (18), guide cables (15) which are arranged vertically next to the lift cage, holding members (19) which are arranged on the lift cage, hoisting means which are connected between the lift cage and a stationary point above the lift cage, and tensioning means (16) which are connected to the guide cables and a stationary point and are suitable for tensioning the guide cables, while the lift cage is in use, in such a manner that the floor (20) of the lift cage is held substantially horizontally. The lift cage is guided vertically by each combination of a holding member and a guide cable, the holding members being free from the hoisting means. <IMAGE>
