Abstract (en)
[origin: EP1016768A2] This invention relates to vertical fencing, and in particular to self-adjusting vertical tube fencing. According to the invention there is provided vertical fencing comprising a pair of rails and a plurality of fence members attached thereto, the fence members being pivotable relative to the rails, characterised in that the fence members are tubular, and in that each fence member carries a resiliently-biased projection which is engageable with recess means in one of the rails <IMAGE>
