Abstract (en)
[origin: EP1016820A2] The carrying element is a single chain (12). Measures or facilities are provided, in order to adjust the illumination body (11) in a desired illumination position, despite the single chain suspension. The chain (12) engages laterally outside the point of gravity and preferably engages at this at the outer edge of the illumination body (11) and consists of links (17), which with vertical alignment of the chain (12) relative to the adjacent links (17), cannot be swiveled away from the illumination body (11).
