Abstract (en)
Gas burner receives gas through injector (5) and gas regulator (6), and primary and secondary air supplies. Secondary air flow is guaranteed by fan (13) blowing air in chamber (14) and with hole (15) allowing air to exit chamber towards flames (16). Fan commands depend of power commands (19). Commands (17) will guaranty constant pressure in chamber following pressure sensor (18) readings.

Abstract (fr)
La présente invention se rapporte à l'alimentation en air secondaire d'un brûleur à gaz comportant des moyens (5, 6) d'alimentation en gaz, des moyens d'alimentation en air primaire et des moyens (13, 14, 15) d'alimentation en air secondaire. Les moyens d'alimentation en air secondaire comportent des moyens (13) pour forcer le déplacement de l'air. <IMAGE>
