Abstract (en)
[origin: WO9841255A2] An inhalation device for providing a substance in a dispersion chamber for inhalation, the device including one or all of a slip clutch for driving an inhaler, apertures in the dispersion chamber to remove settled substance, a seal between a channel and the dispersion chamber, an enclosed passageway extending into the dispersion chamber from which rotational drive may be taken, a portion through which an indication on a housed inhaler may be viewed, a release mechanism for the piston of a suction chamber and a component for simultaneously operating the grip portion of a housed inhaler and opening an air path in the device.
