Abstract (en)
[origin: WO0006348A1] The invention relates to an electric dry razor (1) which comprises at least one shear blade (5) arranged in a pivoting head frame which is closed at the sides. Blades oscillating in the longitudinal direction of the shear blades (5) cooperate with said shear blade. The head is removably joined to the base (2) containing the drive unit. The head frame (3) is configured in two parts. The outer head part (4) which supports the shear blade(s) (5) is joined to the part (6) of the head frame (3) that is removably fixed to the base (2) about an approximately central swivelling axis (8) which is perpendicular to the direction of oscillation (7) of the blades.
