Abstract (en)

[origin: WO9852848A1] The invention relates to a container for collecting recyclable materials, comprising a transport container (2) and a base container (1). Said transport container and said base container are suitable for receiving at least one transport receptacle. The side walls and base of the base container (1) are identical to those of the transport container (2). The invention therefore provides an economical system of disposal which can be adapted if required to suit town-planning considerations.
