Abstract (en)  
[origin: EP1018585A1] Trowel (1) for the application of a curable, e.g. waterproof, layer to a surface, the trowel (1) having a main body (2) with at least one working edge (4) comprising alternating teeth (5) and notches (6), which trowel (1) further comprises spacer means (7) standing proud of the teeth (5). At least one of the spacer means (7) is positioned in or next to a notch (6). The notches (6) in which the spacer means (7) are positioned are somewhat larger than the other notches (6). The spacer means (7) are substantially plate-shaped and positioned at substantially right angles to the working edge (4). The projecting outer ends of the spacer means (7) are chamfered or semi-circular, having an axis of rotation which coincides with the line defined by the outer ends of the teeth (5). <IMAGE>
