Abstract (en)

Liquid fuel is impregnated into and held in cotton filling (3) formed of absorbent fibrous material stored in a fuel tank (2), and the liquid fuel is sucked up by a suction section (62) of a wick (6) and burnt in a combustion section (61). A fuel containing section of the fuel tank (2) has a split structure, with split sections of split, parts (21) and (22) being joined together. The cotton filling (3) and the wick (6) are fitted into the fuel tank (2) in a good condition. <IMAGE>
